WORK HISTORY

Software Engineering Intern (Full-Stack) –Tyr1Labs

May 2026 – Present (Remote)

- Maintained and expanded a Python/Flask backend web app and Android-based device management system
- Optimized REST API endpoints, improved MDM enrollment flows through QR provisioning, and integrated new features such as ATA support into a Leaflet-based mapping interface

Harrisonburg Redevelopment Housing Authority

Jan 2024 – May 2026 Harrisonburg, VA

Student Office Assistant, Part-time

- Assist low-income families in the Harrisonburg area with their rent through housing vouchers
- Perform administrative tasks including filing, organizing, and editing paperwork

INDEPENDENT PROJECTS

Automated Trading Bot — Python (Mar 2025)

- Developed an automated trading bot that integrates a multitude of different APIs
- Uses a variety of technical indicators and proper risk management for placing real-time orders, back testing custom strategies, retrieving historical market data, and sending real-time alerts

Cuisine Search — Java (Jul 2024)

- Developed a Java GUI that finds nearby restaurants using web scraping on Google Maps website.
- Allows users to select a desired cuisine and generates a list of relevant nearby restaurants

Cover Letter Generator — HTML, JavaScript, Python (Dec 2025)

- Web application that generates a professional, customized cover letter from a user's resume and a job description
- The generated cover letter is displayed quickly and can be easily copied to the user's clipboard

CLASS PROJECTS

Command-line shell — C, Team Project (September 2025)

- Collaborated with a team of two to build a command-line shell with functionality similar to Bash.
- Implemented commands such as pwd, which, chmod, head, and others
